Telcos Lead Rankings of ICT Companies

Telco Telekom Slovenije and mobile operators Mobitel and Simobil were the three biggest information and communication technology (ICT) companies in Slovenia in 2010, a new survey shows.

The top three are followed by cable operator Telemach, IT firm ComTrade, IBM Slovenija, telco T-2, system integration company SRC, IT company S&T Slovenija and ATM network operator Bankart. Outfit7, one of the leading providers of smart phone applications in the world, made the biggest leap in 2010 and placed eleventh. The list – based on a survey and published by the business daily Finance last month – features the 50 biggest companies in telecommunications, manufacturing, computers, computer and telecommunication equipment and IT services, but leaves out wholesale and retail traders of computer equipment.
