

NewFrontiers

Get a QuickStart on Enterprise Reporting for SAP

quick, reliable and cost-effective

Our value to your organisation

- Valuable business insight delivered in days
- A low risk and cost effective Enterprise Reporting solution based on Oracle technology
- Flexible open architecture that allows you to rapidly respond as the needs of your business change

Why and when?

- The current reporting solution is not meeting our company's needs
- We have SAP/BW but still have not got round to implementing it or implementation is taking too long
- We need to bring data together from systems other than SAP, to provide integrated Management Information
- Our company already uses Oracle technology; we want to make better use of its capabilities
- Our management information needs are continually evolving and by basing them on an open Oracle solution, our cost of ownership will be significantly reduced.

QuickStart components

- Complete integrated Enterprise Reporting solution with specific focus on delivering reports from a variety of business subject areas / SAP modules by NewFrontiers
- Built on standard Oracle technology; Database 10g, Fusion middleware (OWB) and Oracle BI including web based reporting

POWERED BY
ORACLE

Oracle, Leon Oud, Director Strategic Sales EMEA
"Through a joint initiative with NewFrontiers we are now in a position to provide a comprehensive management information solution for our SAP customers, that can be delivered rapidly and easily be customized for specific business needs"

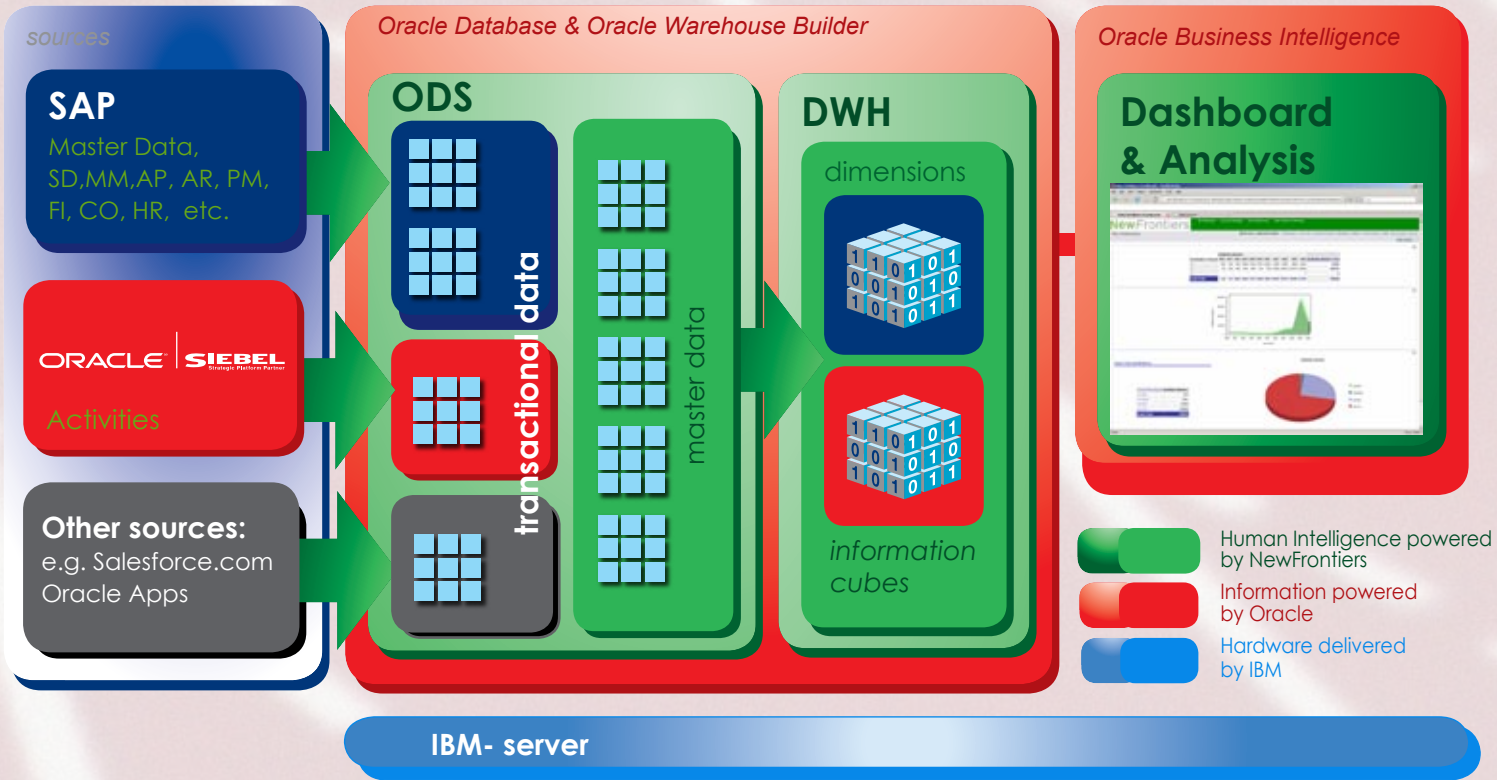

IBM
Business
Partner

IBM System p, Frank van Balen, Director Benelux:
"We are excited in providing the hardware platform and associated performance and scalability to support this unique value proposition from NewFrontiers and Oracle"
